

CRISTIAN ESTRELLA

Software Engineer in Test (SDET) / QA Automation Engineer

Guadalajara, México | +52 (644)-2213047 | cristianestrella_@hotmail.com

[LinkedIn](#) | [GitHub](#) | [Page](#) Education: Software Engineer (ITSON Bachelor's Degree).

PROFESSIONAL SUMMARY

Result-oriented Software Engineer in Test (SDET) with 10+ years of experience designing robust test automation architectures across web, API, and cloud environments. Expert in modern QA stacks including Playwright and GitHub Actions CI/CD pipelines, with AI-assisted test automation, leveraging Claude / Copilot AI to accelerate test case generation and optimize code efficiency with MCP to generate tests with context. Fully bilingual (Spanish/English) with a strong background in Agile methodologies.

TECHNICAL SKILLS

- **Automation & Testing:** Playwright, Cypybara, Protractor, Selenium HQ, Galen Framework, Cucumber, SitePrism, Jasmine, Rspec, TestNG, Junit/Nunit.
- **APIs & Performance:** Postman, Newman, k6, Rest Assured.
- **DevOps & CI/CD:** Docker, GitHub Actions, Codefresh, Jenkins, SauceLabs.
- **AI & Productivity:** Claude / Copilot + MCP, Spectest, Prompt engineering.
- **Languages:** Typescript, JavaScript, Ruby, Python, Java, C#.

WORK EXPERIENCE

Freelance SDET AI Consultant — Independent/Multiple Clients | Jan 2023 – Present

- Delivered test automation and QA consulting for fintech and financial-services clients, designing end-to-end Playwright test suites and CI/CD pipelines integrated via GitHub Actions.
- Leveraged AI-assisted workflows with Spectest and Claude, Copilot + MCP to accelerate test case generation and reduce scripting time by 40%.
- Advised on test strategy and automation architecture across 2 clients.
- Designed and implemented API test automation within the Playwright framework.
- Migration of legacy Selenium test suites to Playwright with TypeScript.

Modus Create | *Sr. Software Engineer in Test* | Oct 2018 – Apr 2022

- Collaborated with a US-based Education Technology leader to modernize core web application sections (Course Planner and Scholarships), successfully migrating from PHP to React.
- Designed and maintained automation testing suites using Capybara, Cucumber, Rspec, and SitePrism executed inside Docker containers.
- Conducted API testing and validation leveraging Postman and Newman to ensure secure data transactions.
- Performed load and performance testing with k6, identifying critical bottlenecks before deployment.
- Being part of an Agile/Scrum team with quality mindset, Developer and Product Owners / QA Collaboration

Wizeline | *Software Engineer in Test* | Jun 2015 – Oct 2018

- Developed a complete end-to-end automation testing architecture from scratch using the Page Object Pattern with Protractor and Jasmine.
- Served as an embedded contractor for NewsCorp brands (Move, Inc. and Escape), streamlining QA workflows within agile product development teams.
- Integrated automated testing pipelines into Jenkins CI/CD and optimized multi-browser cross-platform execution via SauceLabs.
- Executed comprehensive layout and visual regression testing using the Galen Framework.

Tiempo Development | *QA Engineer* | Apr 2013 – Jun 2015

- Owned the quality assurance process for an Electronic Medical Records (EMR) web application built on PHP, Zend Framework, and MySQL.
- Built automation scripts utilizing Selenium HQ and TestNG in Java, reducing manual regression testing cycles.
- Collaborated directly with Business Analysts and Product Owners to define acceptance criteria and formalize the "Definition of Done".
- Managed defect tracking using Rally.

Pinnacle Aerospace | *Embedded Engineer* | Feb 2012 – Apr 2013

- Achieved and verified MC/DC level B and C safety-critical compliance through rigorous requirement testing.
- Authored and maintained automated test scripts in Python and proprietary languages, ensuring 100% requirements traceability.
